

Memberships

The European Association for Potato Research

Aims

The Association has the following aims:

- To promote the exchange between various countries, both in and outside Europe, of scientific and general information relating to all facets of potato growing and utilization;
- To encourage and assist international cooperation in this field.

These aims are achieved through:

Sections

From its founding EAPR has been very much enhanced by the activities of the Sections which have performed the invaluable function of promoting interchange of knowledge within specific disciplines. When a new section chairman is elected, he or she may not be familiar with some of the procedures and activities of the sections which they have been asked to lead. **Notes** have been provided as a guide to these procedures. The association has five sections **agronomy, breeding and varietal assessment, post harvest, pathology and pests, physiology and virology**. The **sections** meet regularly to discuss problems and results of research. They set up working groups for the study of special problems, for standardizing methods of research or terminology, etc.

+ Reduced rates for the meetings!

ALL INFORMATION AVAILABLE ON WEB SITE

The screenshot shows a web browser window with the URL www.eapr2017.com. The main content area features a large banner image of the Versailles gardens. Overlaid on the banner is the text: "EAPR 2017 20th TRIENNIAL CONFERENCE Versailles • 9-14 July 2017" with a stylized Eiffel Tower icon. Below this is a dark blue box with the text "POTATO FACING GLOBAL CHALLENGES" and a button that says "> WELCOME MESSAGE". A large white text overlay reads "Potato facing global challenges!". At the bottom of the banner, there are three sections: "Organised by" with the ARVALIS logo, "With the support of" with logos for cnipt, GIPT, and agnis, and "With the collaboration of" with the INRA logo. The Windows taskbar is visible at the bottom of the browser window, showing the time as 19:02 on 22/05/2016.
